

Young Woo Nam (Young), Ph.D.

Post-doctoral Fellow
Department of Biomedical and Pharmaceutical Sciences
Chapman University, School of Pharmacy
Irvine, CA 92618

ywnam@chapman.edu

Research Experience

2022.11 to Present

Position: Research associate
Chapman University, School of Pharmacy (CUSP), Irvine, CA

- Lab system setting and protocol optimization for the large-scale expression and purification system for membrane proteins.
- 3D structure determination of KCa2/3/4 channels. (Cryo-EM approaches)
- Prepare publication

2015. 11 to 2022. 11

Position: Post-doctoral Fellow
Chapman University, School of Pharmacy (CUSP), Irvine, CA

- Researching for structures of KCa2/3/4 channels in complex with their small modulators. (**Determined 3D structure in complexes with SKS-11 and SKS-14 modulators, published**)
- Identification of allosteric binding site in KCa2/3.
- Screening and discovery of small molecules for KCa2/3/4 channels. (**Found one positive allosteric modulator, Patent-On process**)
- Study on biophysical function of KCa2/3/4 channels- Patch clamp.

2015. 04 to 2015. 10

Position: Researcher

Graduate school of Agriculture and Life Sciences, The University of Tokyo, Japan

- Researching for structures of novel UDP-glucose hexose 1-phosphate uridylyltransferase (GalE) in novel GNB/LNB pathway
- Co-crystals (UDP, UDP-glucose, UDP-galactose, and UDP-GlcNac)
- Determination of structures and refinement structures. (CCP4i, WinCoot, Phenix, Pymol, and Chimera)
- Prepare publication.

Education

2012 to 2015

Graduate school of Agriculture and Life Sciences, The University of Tokyo, Japan.

Ph.D. (Structural biology)

Thesis title: Studies on structures of novel sugar metabolic enzymes

Advisor: Shinya Fushinobu (Professor)

2010 to 2012

Graduate school of Agriculture and Life Sciences, The University of Tokyo, Japan.

M.S. (Structural biology)

Thesis title: Characterization of Sulerythrin from *sulfolobus tokodaii*

Advisor: Takayoshi Wakagi (Professor)

1999 to 2007

College of Biotechnology, Mokwon University, South Korea

B.S. (Microbiology)

Teaching Experience

2015 to Present

Chapman University, School of Pharmacy (CUSP)

Teaching assistance for Pharm.D. students, graduate students, and undergraduate students.

2010 to 2015

Graduate school of Agriculture and Life Sciences, The University of Tokyo, Japan.

Teaching assistance for graduate students, and undergraduate students.

Research techniques and Specialties

Structural biology:

Protein crystallization, X-ray data collection, Experimental phasing (SAD), Molecular replacement, Model building & refinement.

Pymol, Chimera, CCP4i, WinCoot, Phenix, HKL2000, Mosquito (sptlabtech), PROTEUM3 (Bruker AXs Inc.), Synchrotron, X-ray generator: **D8 Venture (Bruker)-single crystal diffraction- Home facility in Chapman University, School of Pharmacy.**

Biochemistry:

Protein expression: *E. coli*, Sf-9, mammalian cell (HEK293s GnTI⁻ and HEK293F GnTI⁻)

Protein purification: Various affinity chromatography- Ni-NTA, Strep II, Immunoaffinity (immunoprecipitation assay, CNbr-activation), ion-exchange chromatography, and gel-filtration (SEC)

SPR (Interaction between protein and small molecules), HPLC (ÄKTA pure), MALDI-TOF/MS, CD spectra, ICP-AES, UV-visible spectrum, Amino acid sequence, Western blot, and various enzyme activity assay.

Molecular biology:

Isolation genomic DNA, Gene cloning and recombinant DNA synthesis (in-fusion cloning, SLIC cloning, Gibson assembly, Gateway cloning and Site-directed mutagenesis), Transfection of cells, and generating baculovirus (BacMam system).

Cell Biology:

Mammalian cell culture- Endothelial cells, and HEK cells, cell transfection.

Pharmacology:

Patch clamp (Drug screening), Flow cytometer (BD FACSMelody), Confocal microscope

PDB Record with ligands

2013 -Synchrotron, Japan

4IIB: Crystal structure of beta-glucosidase 1 from *Aspergillus aculeatus*

4IIC: Crystal structure of beta-glucosidase 1 from *Aspergillus aculeatus* in complex with isofagomine

4IID: Crystal structure of beta-glucosidase 1 from *Aspergillus aculeatus* in complex with 1-deoxynojirimycin

4IIE: Crystal structure of beta-glucosidase 1 from *Aspergillus aculeatus* in complex with calystegine B(2)

4IIF: Crystal structure of beta-glucosidase 1 from *Aspergillus aculeatus* in complex with castanospermine

4IIG: Crystal structure of beta-glucosidase 1 from *Aspergillus aculeatus* in complex with D-glucose

4IIH: Crystal structure of beta-glucosidase 1 from *Aspergillus aculeatus* in complex with thiocellobiose

2015 -Synchrotron, Japan

4WH1: N-Acetylhexosamine 1-kinase (ligand free)

4WH2: N-acetylhexosamine 1-kinase in complex with ADP

4WH3: N-acetylhexosamine 1-kinase in complex with ATP

4ZLE: Cellobionic acid phosphorylase - ligand free structure

4ZLF: Cellobionic acid phosphorylase - cellobionic acid complex

4ZLG: Cellobionic acid phosphorylase - gluconic acid complex

4ZLI: Cellobionic acid phosphorylase - 3-O-beta-D-glucopyranosyl-alpha-D-glucopyranuronic acid complex

2017 -D8 Venture (Bruker)- in house, USA

5WBX: Structural insights into the potency of SK/IK channel positive modulators (SKA-11, activator)

5WC5: Structural insights into the potency of SK/IK channel positive modulators (SKA-14, activator)

2018 -D8 Venture (Bruker)- in house, USA

6CZQ: A V-to-F substitution in SK2 channels causes Ca²⁺ hypersensitivity and improves locomotion in a *C. elegans* ALS model

6ALE: A V-to-F substitution in SK2 channels causes Ca²⁺ hypersensitivity and improves locomotion in a *C. elegans* ALS model (NS390, activator)

2019 -Synchrotron, Japan

6K0G: Crystal Structure of UDP-glucose 4-epimerase from *Bifidobacterium longum* in complex with NAD⁺ and UDP

6K0H: Crystal Structure of UDP-glucose 4-epimerase from *Bifidobacterium longum* in complex with NAD⁺ and UDP-GlcNAc

6K0I: Crystal Structure of UDP-glucose 4-epimerase from *Bifidobacterium longum* in complex with NAD⁺ and UDP-Glc

2021 -D8 Venture (Bruker)- in house, USA

7MCR: Human Apex/Ref1 homodimer formed under oxidative condition

7MEV: Human Apex/Ref1 monomer with C138A mutation
